

Mastectomy is surgery to remove the breast to treat or prevent breast cancer. Whether you chose to have your breast rebuilt with an implant or your own tissue, and if you had nipple-sparing surgery or your nipple was removed, many options are available. These include clothing, prosthetics, and temporary or permanent tattoos. The list below includes resources in Utah.

If you are interested in permanent nipple tattoos, please talk to your health care team. They can discuss possible risks and the best timing for the procedure based on your treatment and healing.
